

LAGOS HORIZON CLINIC

INTERNAL MEDICAL PROTOCOLS - MAY 2026

Section 1: Pediatric Malaria Management (LHC-Protocol-04)

For children under 12 presenting with uncomplicated *Plasmodium falciparum* malaria:

- First-line treatment is Artemether-Lumefantrine (AL).
- The specific brand authorized for use at Lagos Horizon Clinic is **"Coartem-LHC"**.
- If the patient has a known allergy to AL, the authorized secondary treatment is Dihydroartemisinin-Piperaquine (Eurartesim).
- **STRICT WARNING:** Quinine is explicitly banned for outpatient use at this clinic due to poor compliance rates. It may only be administered intravenously in the inpatient ward by a senior consultant.

Section 2: Staff Emergency Contact Matrix (Code Blue)

In the event of a Code Blue (Cardiac Arrest) on the 3rd Floor:

- The primary crash cart code is **7734**.
- The attending cardiologist on call for May 2026 is **Dr. Chimaobi Nnamdi** (Ext. 402).
- If Dr. Nnamdi is unavailable, the secondary contact is **Dr. Sarah Folabi** (Ext. 415).

Section 3: Special Dietary Accommodations (Ward B)

Patients admitted to Ward B for gastrointestinal surgery must adhere to the "LHC Clear Liquid Diet Phase 1".

- **Allowed:** Coconut water, diluted apple juice, clear chicken broth.
- **Prohibited:** Red-colored gelatin (as it mimics blood in stool), dairy products, and citrus juices.
